06/2017 – Present

PERSONAL PROJECTS

Employee Payment Management System(using Python) (05/2019 – 06/2017) ⧉

- It has been designed for the purpose of maintaining details of salary of employees.
- Also, it generates the salary Sheet of the employees of the organization that assists the accounts department in many ways
- It also takes care about GPF, CPF and INCOME TAX according to the Government Rules
- Web based software.

Blood Donation Management System(using PHP & MYSQL) (07/2019 – 03/2019)

- It is an voluntary and non-governmental project.
- We have attempted to provide the answer by taking upon itself the task of collecting Blood bank project nationwide for the cause and care of people in need.
- Blood Bank Management System (BBMS) is a browser based system.
- This project aims at maintaining all the information pertaining to blood donors, different blood groups available in each blood bank and help them manage in a better way.
